

Use of microarrays in cytogenetics research **FREE educational workshop**

Microarrays are revolutionizing cytogenetics research. You are invited to join us at one of our **FREE educational workshops** to discover how innovations are allowing cytogeneticists to detect aberrations more easily than ever before. Our workshop is co-hosted with Dr. Francesc Solé, IMIM-Hospital del Mar.

Date: 28th September 2009

Time: 10:00 – 13:00
(refreshments will be provided)

Location: Xipre (Seminari 173.06-183.01)
Parc de Recerca Biomèdica de Barcelona (PRBB) - IMIM
c/ Dr. Aiguader, 88
E-08003 Barcelona
Spain

Join this workshop to learn about:

- A user's view on the advantages and practical issues of routine microarray use.
- An overview of the next-generation Affymetrix Cytogenetics Research Solution, which enables simple, streamlined sample processing.
- An interactive demonstration on how to detect chromosome aberrations with the Chromosome Analysis Suite (ChAS), and the opportunity to analyze sample data.
